Abstracts

Allied Motion Technologies Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Allied Motion Technologies Inc. and its competitors. This provides our Clients with a clear understanding of Allied Motion Technologies Inc. position in the [Electrical Equipment](#) Industry.

The report contains detailed information about Allied Motion Technologies Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Allied Motion Technologies Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Allied Motion Technologies Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Allied Motion Technologies Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Allied Motion Technologies Inc. business.

About Allied Motion Technologies Inc.

Allied Motion Technologies Inc. engages in the design, manufacture, and sale of motor, servo motion and optical encoder products worldwide.

The end products using the company's technology in the medical and health care industries include wheel chairs, scooters, stair lifts, patient lifts, patient handling tables and beds, electric powered surgical hand pieces, programmable pumps to meter and administer infusions associated with chemotherapy, pain control and antibiotics; nuclear imaging systems, automated pharmacy dispensing equipment, kidney dialysis equipment, respiratory ventilators and heart pumps.

In electronics, the company's products are used in the handling, inspection, and testing of components and in the automation and verification of final products such as a PC, game equipment, and cell phone. Its motors are used in the HVAC systems of trucks, buses, RV's, boats and off-road construction/farming equipment. These motors operate various actuation systems, including lifts, slide-outs, and covers.

The company's products are also utilized in vehicles, vehicles using alternative fuel systems, such as LPG, fuel cell and hybrid vehicles. Its geared motor products are

utilized in commercial grade floor cleaners, polishers and material handling devices for factories and commercial buildings. The company's products are also used in a variety of military/defense applications, including inertia guided missiles, mid range munitions systems, weapons systems on armed personnel carriers and in security and access control in camera systems, door access control and in airport screening and scanning devices. Other end products utilizing its technology include high definition printers; tunable lasers and spectrum analyzers for the fiber optic industry; processing equipment for the semiconductor industry, as well as cash dispensing machines (ATM's).

The company's subsidiaries include Emoteq Corporation (Emoteq), Motor Products Corporation (Motor Products—Owosso, MI), Stature Electric, Inc. (Stature—Watertown, NY), and Precision Motor Technology B.V. (Premotec—Dordrecht, The Netherlands).

Emoteq designs, manufactures and markets high performance brushless and brush DC motors, drives and control electronics. Motor types include servo motors, frameless motors, torque motors and high speed (60,000 RPM+) brushless DC motors. Markets served include semiconductor manufacturing, industrial automation, medical equipment, and military and aerospace. Emoteq also manufactures COPI high resolution encoders, precision high resolution servo motors and integrated motor/encoder assemblies. Emoteq's primary encoder markets are in aerospace and defense as well as telecommunications, semiconductor and scanning equipment manufacturing. Applications include missile seeker heads, flight surface controls, tunable lasers, spectrum analyzers, wavemeters, programmable attenuators, and 3D scanners.

Motor Products is a motor producer and is a manufacturer engineered fractional horsepower permanent magnet DC and brushless DC motors serving a range of original equipment applications. The motors are used in mobile HVAC systems, actuation systems, and specialty and general purpose pumps in various markets including trucks, buses, boats, RV's, off-road vehicles, health, fitness, medical and industrial equipment.

Stature designs and manufactures fractional and integral horsepower geared motion solutions utilizing permanent magnet DC and brushless DC motor technology. Stature's component products are sold primarily to original equipment manufacturers (OEM'S) that use them in their end products. Stature Electric excels at engineering, designing, packaging and applying integrated gearing and motor solutions for the commercial and industrial equipment, healthcare, recreation, and non-automotive transportation markets.

Premotec manufactures small precision electric motors utilizing four different motor

technologies: brushless DC, coreless DC, iron core DC, and permanent magnet stepper and synchronous motors. Premotec also offers a range of reduction gearboxes tailored to a number of these motors. Premotec's products are sold to OEM customers in Europe, the United States and Asia and through distributors to smaller OEM's in almost all countries of the European Union. The products are used in various medical, professional and industrial applications, such as dialysis equipment, industrial ink jet printers, cash dispensers, bar code readers, laser scanning equipment, fuel injection systems, HVAC actuators, waste water treatment, dosing systems for the pharmaceutical industry, textile manufacturing, document handling equipment, and studio television cameras.

History

Allied Motion Technologies Inc. was founded in 1962.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
