Abstracts

Altra Holdings, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Altra Holdings, Inc. and its competitors. This provides our Clients with a clear understanding of Altra Holdings, Inc. position in the [Heavy Machinery](#) Industry.

The report contains detailed information about Altra Holdings, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Altra Holdings, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Altra Holdings, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Altra Holdings, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Altra Holdings, Inc. business.

About Altra Holdings, Inc.

Altra Holdings, Inc., through its principal subsidiary, Altra Industrial Motion, Inc., engages in the design, production, and marketing of various mechanical power transmission (MPT) and motion control products in North America, Europe, and Asia. The company serves customers in a group of industries, including energy, general industrial, material handling, mining, transportation and turf and garden.

Products

The company produces and markets various MPT products. Its product portfolio includes industrial clutches and brakes, open and enclosed gearing, couplings, engineered belted drives, engineered bearing assemblies and other related power transmission components which are sold across various industries. The company's products serve various end markets including aerospace, energy, food processing, general industrial, material handling, mining, petrochemical, transportation and turf and garden.

The company primarily sells its products to OEMs and through relationships with the industry's industrial distributors, such as Motion Industries, Applied Industrial Technologies, Kaman Industrial Technologies and W.W. Grainger.

Clutches and Brakes

The company manufactures various clutches and brakes in three main product categories: electromagnetic, overrunning and heavy duty.

Electromagnetic Clutches and Brakes: The company's industrial products include clutches and brakes with specially designed controls for material handling, forklift, elevator, medical mobility, mobile off-highway, baggage handling and plant productivity applications. It also offers a line of clutch and brake products for walk-behind mowers, residential lawn tractors and commercial mowers. While industrial applications are predominant, the company also manufactures vehicular applications, including on-road refrigeration compressor clutches and agricultural equipment clutches. It markets its electromagnetic products under the Warner Electric, Inertia Dynamics and Matrix brand names.

Overrunning Clutches: Specific product lines include indexing and backstopping clutches. Primary industrial applications include conveyors, gear reducers, hoists and cranes, mining machinery, machine tools, paper machinery, packaging machinery, pumping equipment and other specialty machinery. The company markets and sells these products under the Formsprag, Marland and Stieber brand names.

Heavy Duty Clutches and Brakes: The company's heavy duty clutch and brake product lines serve various markets, including metal forming, off-shore and land-based oil and gas drilling platforms, mining, material handling, marine applications and various off-highway and construction equipment segments. Its line of heavy duty pneumatic, hydraulic and caliper clutches and brakes are marketed under the Wichita Clutch and Twiflex brand names.

Gearing

These products are used in various industrial, material handling, mixing, transportation and food processing applications. Specific product lines include vertical and horizontal gear drives, speed reducers and increasers, high-speed compressor drives, enclosed custom gear drives, various enclosed gear drive configurations and open gearing products such as spur, helical, worm and miter/bevel gears. The company designs and manufactures a range of gearing products under the Boston Gear, Nuttall Gear and Delroyd brand names.

Engineered Couplings

The company's coupling product line includes gear couplings, high-speed disc and diaphragm couplings, elastomeric couplings, grid couplings, universal joints, jaw couplings and spindles. Its coupling products are used in a range of markets, including power generation, steel and custom machinery industries. The company manufactures a range of coupling products under the Ameridrives, Bibby and TB Wood's brand names.

Engineered Bearing Assemblies

The company's engineered bearing assembly product line includes ball bearings, roller bearings, thrust bearings, track rollers, stainless steel bearings, polymer assemblies, housed units and custom assemblies. It manufactures a range of engineered bearing products under the Kilian brand name. It sells bearing products to a range of end markets, including the general industrial and automotive markets, with a particularly OEM customer focus.

Engineered Belted Drives

The company's belted drive line includes three types of v-belts, three types of synchronous belts, standard and made-to-order sheaves and sprockets, and split taper bushings. It sells belted drives to a range of end markets, including aggregate, energy, chemical and material handling.

Power Transmission Components

The company manufactures or markets various power transmission components under several businesses, including Warner Linear, Huco Dynatork, Boston Gear, Warner Electric, TB Wood's and Matrix.

Warner Linear: Warner Linear is a designer and manufacturer of rugged service electromechanical linear actuators for off-highway vehicles, agriculture, turf care, special vehicles, medical equipment, industrial and marine applications.

Huco Dynatork: Huco Dynatork is a manufacturer and supplier of a range of precision couplings, universal joints, rod ends and linkages.

Other Accessories: The company's Boston Gear, Warner Electric, Matrix and TB

Wood's businesses make or market other accessories, such as sensors, sleeve bearings, AC/DC motors, shaft accessories, face tooth couplings, mechanical variable speed drives, and fluid power components that are used in various end markets.

Competition

The company competes with Emerson Power Transmission Manufacturing LP, Rexnord LLC., Regal-Beloit Corporation, and Baldor Electric, Inc.

History

Altra Holdings, Inc. was founded in 2004.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
