pertaining to profitability, margin analysis, asset turnover, credit ratios, and company’s long-term solvency. This sort of company's information will assist and strengthen your company’s decision-making processes.

In the part that describes American Fiber Green Products, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company’s competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company’s business and sales activities will be boosted by gaining an insight into your competitors’ businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of American Fiber Green Products, Inc. business.

About American Fiber Green Products, Inc.

American Fiber Green Products, Inc. holds a proprietary technology to process waste fiberglass and resins into new commercial products. The company intends to engage in both fiberglass reclamation manufacturing and production of fiberglass leisure products from virgin material.

The company focuses on production of fiberglass reinforced plastic (FRP) products. It subsidiaries include Amour Fiber Core, Inc. and American Leisure Products, Inc.

Amour Fiber Core, Inc (AFC)

AFC’s primary purpose is performing reclamation manufacturing of commercial fiberglass products from molded fiberglass waste and outdated resin waste. The company has reclamation techniques combined with a proprietary process to reclaim fiberglass waste products, obsolete fiberglass molded products, and outdated or excess fiberglass resins. These waste products are principal ingredients in the production of the Amour fiberglass products.

+44 20 8123 2220
info@marketpublishers.com

The company intends produce general planking or boards for marine decking and seawalls. Marketing the planking it would brand its name through park benches and picnic tables. It intends to offer contracts for its licensing of its patented technology. It is licensing its technology to businesses in foreign countries and the North American market.

American Leisure Products, Inc.

The company's second operating subsidiary is American Leisure Products, Inc. (ALP). ALP focuses on producing various fiberglass products that provide recreational enjoyment, such as the Hot Rod car industry and the marine industry. Its fiberglass production facilities would also provide the production of fiberglass vintage car replicas, boats, and other leisure products from molds and tooling, and future acquired molds.

Products

Antique Replicars: Nostalgic replica automobiles (commonly referred to as Hot Rods) are provided at completion levels from the hobbyist who wants to build their own car to the enthusiast that wants to buy a complete automobile ready to drive away. The company would support the dealers with cars (nick-named rollers).

Boats: ALP would produce fiberglass boats from molds and tooling. ALP would produce trawlers, sailboats, and flats boats from its own lines, as well as provide outsource service for other manufacturers.

Other Products: ALP also develops other products. It would design and /or redesign of a product, as well as build the tooling and molds that bring those designs to reality and to market.

History

American Fiber Green Products, Inc. was founded in 1993.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

+44 20 8123 2220
info@marketpublishers.com

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

+44 20 8123 2220
info@marketpublishers.com

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources
- Financial
- Physical
- Technological
- Organizational

Intangible resources
- Human
- Innovation and Creativity

+44 20 8123 2220
info@marketpublishers.com

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
