Abstracts

China Automotive Systems Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between China Automotive Systems Inc. and its competitors. This provides our Clients with a clear understanding of China Automotive Systems Inc. position in the [Auto Parts Industry](#).

The report contains detailed information about China Automotive Systems Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for China Automotive Systems Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The China Automotive Systems Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes China Automotive Systems Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of China Automotive Systems Inc. business.

About China Automotive Systems Inc.

China Automotive Systems, Inc., through Great Genesis Holdings Limited (Genesis), manufactures power steering systems and other component parts for automobiles. The company's operations are conducted through eight Sino-foreign joint ventures in China and a wholly-owned subsidiary in the United States.

The company has business relations with approximately 60 vehicle manufacturers, including FAW Group and Dongfeng Auto Group, two of the automobile manufacturers in China; Shenyang Brilliance Jinbei Co., Ltd., the light vehicle manufacturer in China; Chery Automobile Co., Ltd, the state owned car manufacturer in China, Xi'an BYD Auto Co., Ltd and Zhejiang Geely Automobile Co., Ltd., the private owned car manufacturers. In 2007, Genesis established a wholly-owned subsidiary, Jingzhou Hengsheng Automotive System Co., Ltd, 'Hengsheng', to engage in production and sales of automotive steering systems.

From 2008, the company has supplied power steering pumps and power steering gear to the Sino-Foreign joint ventures established by General Motors (GM), Citroen and Volkswagen. In 2009, the company began to supply power steering gear to Chrysler North America. The company is in the process of integrating new advanced

technologies, such as electronic chips in power steering systems into its production line.

In 2001, the company signed a 10-year licensing agreement with Bishop Steering Technology Limited, which offers advanced technology for steering valves within the contract period. In 2003, the company signed a Technology Transfer Agreement with Nanyang Ind. Co. Ltd., a steering column maker, for the technology necessary for electronic power steering (EPS) systems. In addition, the company established with Tsinghua University a steering systems research institute designed to develop Electronic Power Steering (EPS) and Electronic Hydraulic Steering Systems (EHPS).

Customers

The company's customers include BYD Auto Co., Ltd; Chery Automobile Co., Ltd; Beiqi Foton Motor Co., Ltd.; Zhejiang Geely Holding Co., Ltd; Brilliance China Automotive Holdings Limited; Dongfeng Auto Group Co., Ltd; China FAW Group Corporation; Great Wall Motor Company Limited; Chrysler Group LLC; and Anhui Jianghuai Automobile Group.

Competition

The company's competitors include Shanghai ZF and FKS, which are component suppliers to specific automobile manufacturers. Shanghai ZF is the joint venture of SAIC and ZF Germany, which is a supplier to SAIC-Volkswagen and SAIC-GM. First Auto FKS is a joint venture between First Auto Group and Japan's Koyo Company.

History

China Automotive Systems, Inc. was founded in 2003.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
