Report Overview

Channel speed gates are specialized access control systems designed to manage high-traffic pedestrian flow in public and private spaces, such as airports, metro stations, corporate buildings, and stadiums. These gates combine mechanical barriers (such as flaps or glass panels) with advanced security technologies like biometric scanners, RFID card readers, or facial recognition to ensure efficient, secure, and rapid entry or exit.
The global market for channel speed gates is expanding due to increasing security concerns, urbanization, and the demand for automated access solutions.
