Abstracts

A Collapsible Dock Shelter is a loading dock enclosure designed to create a weatherproof seal between a warehouse and a truck or trailer during loading and unloading operations. It consists of a flexible frame with retractable side and top panels, typically made of durable fabric or foam-filled curtains. When a vehicle backs into the dock, the shelter compresses or folds around the trailer to form a secure seal, preventing outside elements like rain, wind, dust, and pests from entering the facility. When not in use, the shelter collapses to avoid damage from passing vehicles.

The global Collapsible Dock Shelter market size was estimated at USD 307.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 2.90% during the forecast period.
