Abstracts

Kaiser Aluminum Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Kaiser Aluminum Corporation and its competitors. This provides our Clients with a clear understanding of Kaiser Aluminum Corporation position in the Metals and Mining Industry.

The report contains detailed information about Kaiser Aluminum Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Kaiser Aluminum Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Kaiser Aluminum Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Kaiser Aluminum Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Kaiser Aluminum Corporation business.

About Kaiser Aluminum Corporation

Kaiser Aluminum Corporation manufactures fabricated aluminum products primarily in the United States, Canada, and the United Kingdom. The company manufactures rolled, extruded, drawn and forged aluminum products with in three end use categories consisting of aerospace and high strength products, general engineering products, and custom automotive and industrial products. The company serves aerospace companies, automotive suppliers and metal distributors.

Fabricated Products Business Unit

The Fabricated Products business unit produces rolled, extruded, drawn, and forged aluminum products used principally for aerospace and defense, automotive, consumer durables, electronics, electrical, and machinery and equipment end-use applications. In general, the Fabricated Products business unit manufactures products in one of three categories: Aero/HS products; GE products; and Custom products.

Aerospace and High Strength Products: The company's Aero/HS products include heat treat plate and sheet, as well as cold finish bar, drawn tube and billet that are manufactured to demanding specifications for the global aerospace and defense

industries. The company's Aero/HS products are used for various end uses. The company makes aluminum plate and tube for aerospace applications, and the company manufactures various specialized rod and bar products that are incorporated in different applications.

General Engineering Products: GE products consist primarily of standard catalog items sold to metal distributors. The company's GE products consist of 6000-series alloy rod, bar, tube, sheet, plate and standard extrusions. The 6000-series alloy is an extrudable medium-strength alloy that is heat treatable. The company's GE products have a range of uses and applications, many of which involve further fabrication of these products for various transportation and other industrial end-use applications where machining of plate, rod and bar is intensive. The company's rod and bar products are manufactured into rivets, nails, screws, bolts and parts of machinery and equipment.

Custom Automotive and Industrial Products: The company's Custom products consist of extruded/drawn and forged aluminum products for many North American automotive and industrial end uses, including consumer durables, electrical/electronic, machinery and equipment, automobile, light truck, heavy truck and truck trailer applications.

Other Custom product sales include extruded products for water heater anodes, truck trailers and electrical/electronic markets. For some Custom products, the company performs limited fabrication, including sawing and cutting to length.

Customers: The company's major customer is Reliance Steel & Aluminum.

Primary Aluminum Business Unit

The Primary Aluminum business unit contains two primary elements: activities related to its interests in and related to Anglesey; and primary aluminum hedging-related activities.

Anglesey: The company owns a 49% interest in Anglesey, which owns an aluminum smelter at Holyhead, Wales. Rio Tinto Plc owns the remaining 51% ownership interest in Anglesey and has day-to-day operating responsibilities for Anglesey. Anglesey produces billet, rolling ingot and sow for the United Kingdom and European marketplace.

Competition

The company's primary competition in the global heat treated flat-rolled products is

Alcoa, Inc. and Rio Tinto Plc. In the extrusion market, the company competes with many regional participants, as well as companies with national reach, such as SAPA, Norsk Hydro ASA and Indalex.

History

Kaiser Aluminum Corporation was founded in 1987.

The above Company Fundamental Report is a half-ready report and contents are subject to change.
It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

- What composes a threat of substitute products and services?
- Is there a threat of new competitors entering the market?
- What is the intensity of competitive rivalry?
- How big is the bargaining power of buyers?
- How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

- Tangible resources
  - Financial
  - Physical
  - Technological
  - Organizational
- Intangible resources
  - Human
  - Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
