The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of East Texas Financial Services Inc. business.

About East Texas Financial Services Inc.

East Texas Financial Services, Inc., organized in 1994, is the savings and loan holding company for First Federal Savings and Loan Association of Tyler, a federally chartered mutual savings and loan association. The Company serves its primary market area, East Texas, with a concentration in Smith and Upshur Counties, through its main office, a full service branch location and loan production office, which are located in Tyler, Texas; a full service branch office located in Gilmer, Texas; and a full service branch located in Whitehouse, Texas. The principal business of the Company consists of attracting retail deposits from the general public and investing those funds in one-to four-family residential mortgage loans, commercial real estate, one-to four-family construction, multi-family, commercial and consumer loans. The Company also purchases mortgage-backed securities and invests in U.S. Government and agency obligations and other permissible investments. It also offers commercial and consumer loans, debit and credit cards, ATM machines and cards and safe deposit boxes.

Lending Activities

One-to four-family Residential Mortgage Lending: The Company originates conventional loans for the acquisition of owner-occupied, one-to four-family residences. It originates these loans primarily from referrals from real estate agents, existing customers, walk-in

customers, builders and from responses to the Company's marketing campaign, directed primarily to individuals in its market area.

Commercial Real Estate and Multi-Family Residential Lending: The Company engages in multi-family and commercial real estate lending, including permanent loans secured primarily by apartment buildings, office buildings, and retail establishments in the Company's primary market area.

Construction Lending: The Company offers loans to owner-occupants and builders for the construction of one-to four-family residences. It also offers loans to a few selected builders in its primary market area to build residential properties in anticipation of the sale of the house or where the house has been pre-sold.

Consumer Loans: The Company offers home equity, home improvement, and consumer loans to individuals.

Commercial Business Loans: The Company's commercial business lending activities encompass loans with a variety of purposes and security, including loans to finance inventory and equipment.

Deposits

The Company offers consumer and commercial checking accounts, passbook savings, NOW checking accounts, money market deposit accounts and certificates of deposit.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
