The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Pope Resources LP business.

About Pope Resources LP

Pope Resources, A Delaware Limited Partnership, through its subsidiaries, engages primarily in managing timber resources.

The Partnership operates in three primary business segments: Fee Timber, Timberland Management & Consulting, and Real Estate. Fee Timber operations consist of growing and harvesting timber from 114,000 acres of tree farms. Timberland Management & Consulting, through a subsidiary, Olympic Resource Management LLC (ORMLLC), provides timberland management services to ORM Timber Fund I, LP (Fund I), which owns 24,000 acres of timberlands in western Washington, and ORM Timber Fund II, Inc. (Fund II), which owns 12,000 acres in western Oregon. ORMLLC also provides timberland management and forestry consulting services to other third party owners of timberlands and is engaged in identification and due diligence for additional timberland investments by Fund II.

Fee Timber segment

The Fee Timber segment consists of operations surrounding management of the Partnership’s core assets: the Hood Canal tree farm, which consists of 70,000 acres located in the Hood Canal area of Washington, and the 44,000-acre Columbia tree farm

+44 20 8123 2220
info@marketpublishers.com

located in southwestern Washington State.

Operations on the tree farms consist primarily of growing, harvesting, and marketing timber and timber products to both domestic and Pacific Rim markets but additionally include other sources, such as cell tower and mineral leases. This segment also includes operations of Fund I and Fund II, which are consolidated into the company's financial statements. The Partnership’s tree farms, as of December 31, 2009, were approximately 114,000 acres. Of this total, approximately 96,000 acres are designated productive acres.

Customers: The Partnership sells its logs domestically to lumber mills and other wood fiber processors located throughout western Washington and northwest Oregon.

Timberland Management & Consulting segment

The Timberland Management & Consulting segment’s operation has been to provide various aspects of timberland management services to third-party timberland owners.

Timberland Investment Management: The timberland investment management program focuses on building and managing diversified timberland portfolios for third-party investors and the partnership.

Timberland Management: Timberland management activities provide forestland management, acquisition, and disposition services to timber property owners. Specialized consulting assignments are performed on an ad-hoc basis.

Real Estate segment

The Partnership’s real estate activities are closely associated with the management of its timberlands. Real Estate segment’s activities consists of investing in and later reselling improved properties, and holding properties for later development and sale. Its portfolio consists of approximately 2,500 acres.

Customers

The company markets its land for sale to private individuals, residential contractors, and developers of commercial property. Customers for rental space in the Port Gamble townsite consist of both residential and commercial tenants.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

+44 20 8123 2220
info@marketpublishers.com

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

+44 20 8123 2220
info@marketpublishers.com

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources
- Financial
- Physical
- Technological
- Organizational

Intangible resources
- Human
- Innovation and Creativity

+44 20 8123 2220
info@marketpublishers.com

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
