Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Gulf Keystone Petroleum Ltd. business.

About Gulf Keystone Petroleum Ltd.

Gulf Keystone Petroleum Limited engages in the exploration, development, evaluation, and production of oil and gas properties in the Republic of Algeria, the Kurdistan Region of Northern Iraq, Bermuda, and the United Kingdom. The company also offers geological, geophysical, and engineering services.

Kurdistan Region of Iraq

In 2007 the company secured interests in two blocks in Kurdistan, Northern Iraq. Kurdistan covers approximately 40,000 square kilometres and is situated in the North Eastern corner of Iraq.

Shaikan: The Shaikan production sharing contract (PSC) was awarded to operator Gulf Keystone (75%) and Kalegran Limited (20%) a subsidiary of MOL Hungarian Oil and Gas Public Limited Company (MOL), and Texas Keystone Inc. (5%) in 2007.

Akri-Bijeel: The Akri-Bijeel PSC was awarded to operator Kalegran Limited (80%) in 2007 along with Gulf Keystone (20%). The Akri-Bijeel Block is adjacent to the Shaikan Block, and covers an area of 889 square kilometres.

Algeria

The company has exploration and appraisal rights over six blocks and two producing fields in the Republic of Algeria. The HBH Permit initially covered an area of 18,830 square kilometres located in the Timimoun Basin/Allal High area of central Algeria, which covered 5 blocks (317b1, 322b3, 347b, 348 and 349b) and contained the HBH gas field.

HBH profile: In 2008, the company entered into Phase 2 of the exploration contract.

Ben Guecha Permit: The Ben Guecha Permit Blocks 108 and 128b, located in North Africa, South East Constantine Basin, cover an area of 4,641 square kilometres. The permit contains the Ras Toumb oil storage facility and part of the 30 kilometre local pipeline which transports oil from the GKN-1 well.

History

Gulf Keystone Petroleum Limited was founded in 2001.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
