ABSTRACTS

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business in South Africa to later chart its long-term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by South Africa PESTEL Analysis:

Political – What opportunities and pressures are brought by South Africa political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures in South Africa are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects of South Africa will work upon the demand for the business's products and operations?

+44 20 8123 2220
info@marketpublishers.com

Technological – What impact do South Africa technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What South Africa laws and legislation will exert influence on the style the business is carried out?

The above South Africa PESTEL Analysis is a half-ready report and contents are subject to change. It means that we have all necessary data in our database to prepare the report but need two business days to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price.
