## Abstracts

IntelGenx Technologies Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between IntelGenx Technologies Corp. and its competitors. This provides our Clients with a clear understanding of IntelGenx Technologies Corp. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about IntelGenx Technologies Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for IntelGenx Technologies Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The IntelGenx Technologies Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes IntelGenx Technologies Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of IntelGenx Technologies Corp. business.

### **About IntelGenx Technologies Corp.**

IntelGenx Technologies Corp., through its subsidiary, IntelGenx Corp., operates as a drug delivery company. The company focuses on the development of orally administered drug delivery products based on its proprietary oral drug delivery technologies.

The company's product development efforts are based upon three delivery platform technologies: a Multilayer Tablet technology, an Oral Film technology, and a Mucoadhesive Tablet technology. Its Multilayer Tablet platform technology allows for the development of oral controlled-release products. The Oral Film technology allows for the instant delivery of pharmaceuticals to the oral cavity, while the Mucoadhesive Tablet allows for the controlled release of active substances to the oral mucosa.

### **Product Portfolio**

The company's product portfolio includes a mix of generic and branded products based on its proprietary delivery technology.

INT0001/2004: This is the generic product involving its Multilayer technology. The

product has been tested in phase I studies.

INT0003/2005: The company has entered into a partnership with Cary Pharmaceuticals for the development of a once-daily tablet product containing an antidepressant and a nicotine antagonist. The product is intended for smoking cessation.

INT0004/2006: The development of an antidepressant Bupropion HCl, the active ingredient in Wellbutrin X has been completed. A regulatory submission file for a 505(b)(2) NDA submission is in preparation.

INT0005/2005: The company is in the process of developing a bilayer tablet containing a fixed-dose combination of a non-steroidal anti-inflammatory drug and a synthetic prostaglandin. Formulation development is completed and a pilot bio batch has been manufactured by the company.

INT0006/2005: The company has entered into a development agreement with Azur Pharma for the development and manufacture of a prenatal vitamin supplement. The product was launched in the United States under the brand name Gesticare.

INT0010/2006: The company has entered into an agreement with Cannasat Therapeutics Inc. for the development of a buccal mucoadhesive tablet product containing a cannabinoid-based drug for the treatment of neuropathic pain and nausea in cancer patients undergoing chemotherapy.

INT0014/2008: Under a development agreement with Cannasat Therapeutics Inc., the company is in the process of developing a controlled-release tablet containing Cannabidiol for the treatment of schizophrenia.

INT0007/2006: An oral film product based on the company's proprietary edible film technology is in the early development stage. The product is intended for the treatment of erectile dysfunction (ED).

INT0008/2007: An oral film product based on the company's proprietary edible film technology is in the early development stage. The product is intended for the treatment of migraine.

INT0015/2008: An oral film product based on the company's proprietary edible film technology is in the early development stage. The product is intended for the treatment of panic attacks.

INT0018/2008: The company has entered into a development and licensing agreement with Circ Pharma Ltd. to formulate, manufacture, and supply a drug product, based upon its proprietary Versatab technology, for the treatment of hyperlipidemia. The product is in the early development stage.

INT0019/2009: An oral film product based on the company's proprietary edible film technology is in the early development stage. The product is intended for the treatment of diarrhea.

### Strategic Alliances

**Manufacturing Partnership:** The company formed a strategic alliance with LTS Lohmann Therapie-Systeme AG (LTS) for the exclusive manufacturing of products developed by it using its VersaFilm drug delivery technology. LTS develops and produces transdermal and film form/wafer oral systems and supplies the international pharmaceutical industry. VersaFilm is IntelGenx's immediate release wafer technology. It consists of a thin polymeric film using United States Pharmacopeia (USP) components that are safe and approved by the FDA for use in food, pharmaceutical, and cosmetic products.

In November 2010, Cynapsus Therapeutics Inc. had a binding Memorandum of Understanding with IntelGenx Corp. As part of this agreement, Cynapsus has retained exclusive worldwide rights to its licensed technology as it relates to generic THC products for the treatment of nausea/vomiting and appetite stimulation.

### Competition

The company's competitors include Biovail Corporation, Labopharm Inc., and Flamel Technologies S.A.

### History

IntelGenx Technologies Corp. was founded in 2003.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same

price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
