Abstracts

Intermap Technologies Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Intermap Technologies Corp. and its competitors. This provides our Clients with a clear understanding of Intermap Technologies Corp. position in the [Commercial Services and Supplies](#) Industry.

The report contains detailed information about Intermap Technologies Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Intermap Technologies Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Intermap Technologies Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Intermap Technologies Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Intermap Technologies Corp. business.

About Intermap Technologies Corp.

Intermap Technologies Corporation provides digital mapping and related services in Canada, the United States of America, Asia/Pacific, and Europe. The company creates three dimensional (3D) digital models of the earth's surface. It is mapping entire countries and building a national database, called NEXTMap, consisting of elevation data and geometric images.

The company's digital maps are used in a range of applications, including geographical information systems (GIS), engineering, automotive, consumer electronics, risk management, oil and gas, renewable energy generation, hydrology, environmental planning, wireless communications, transportation, and 3D visualization. The products are also used to improve the positional accuracy of airborne and satellite images.

The company, working for private industry, governments, and individual consumers worldwide, employs Interferometric Synthetic Aperture Radar (IFSAR) mapping technology, which provides the ability to digitally map large areas and acquire data at any time of the day including overcast and dark conditions.

NEXTMap USA: The company's NEXTMap USA program calls for the mapping of the

entire contiguous United States and Hawaii. The NEXTMap USA program includes terrain elevation and imagery data covering approximately 8.0 million square kilometers of the United States. Various independent agencies have validated its data, including USGS, NGA, NASA, DARPA, U.S. Forest Service, U.S. Army Corps of Engineers TEC, and the University of Washington. As of December 31, 2008, the NEXTMap USA program had data available off the shelf representing approximately 3.9 million square kilometers of area. The NEXTMap USA library includes datasets from 35 states, including datasets of California, Florida, Hawaii, Mississippi, and Oklahoma. It has completed the airborne collection of approximately 7.96 million square kilometers.

NEXTMap Europe: The NEXTMap Europe program calls for the mapping of Western Europe, including Austria, Belgium, Czech Republic, Denmark, England, France, Germany, Irish Republic, Italy, Luxembourg, the Netherlands, Northern Ireland, Portugal, Spain, Scotland, Switzerland, and Wales. The NEXTMap Europe program includes an area of approximately 2.5 million square kilometers.

NEXTMap Production: During 2008, the company had two Learjet aircraft, equipped with IFSAR mapping technology, focused on airborne data collection for NEXTMap initiatives.

Contract Services: The company's contract services business typically involves a client requesting digital map data for a specific location outside of its NEXTMap area of collection.

Significant Events

In January 2010, Intermap Technologies announced collaboration with Hella KGaA Hueck & Co. regarding a predictive front lighting system based on Intermap's reliable 3D road geometries.

Customers

The company conducts a significant portion of its business either directly or in cooperation with the U.S. government, other governments around the world, and international funding agencies. Its major customer is the National Geospatial-Intelligence Agency (NGA), an agency of the U.S. federal government.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
