term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes JPMorgan Chase & Co. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of JPMorgan Chase & Co. business.

About JPMorgan Chase & Co.

JPMorgan Chase & Co., a financial holding company, provides a range of financial services worldwide.

Subsidiaries

The company's bank subsidiaries are JPMorgan Chase Bank, National Association, a national banking association with the U.S. branches in 23 states; and Chase Bank USA, National Association, a national banking association that is the Firm's credit card-issuing bank. Its principal nonbank subsidiary is J.P. Morgan Securities Inc., its investment banking firm in the United States. The bank and nonbank subsidiaries of the company operate nationally, as well as through overseas branches and subsidiaries, representative offices and subsidiary foreign banks.

Segments

The company's segments include Investment Bank, Commercial Banking, Treasury & Securities Services, Asset Management, Retail Financial Services, and Card Services.

Investment Bank

Investment Bank segment provides investment banking products and services, including advising on corporate strategy and structure, capital raising in equity and debt markets, risk management, market-making in cash securities and derivative instruments, and prime brokerage and research. It serves corporations, financial institutions, governments, and institutional investors.

Commercial Banking

Commercial Banking serves approximately 25,000 clients nationally, including corporations, municipalities, financial institutions, and not-for-profit entities. Commercial Banking is divided into four primary client segments: Middle Market Banking, Commercial Term Lending, Mid-Corporate Banking, and Real Estate Banking. Middle Market Banking covers corporate, municipal, financial institution and not-for-profit clients. Commercial Term Lending primarily provides term financing to real estate investors/owners for multi-family properties as well as financing office, retail and industrial properties. Real Estate Banking provides full-service banking to investors and developers of institutional-grade real estate properties.

Treasury & Securities Services

Treasury & Securities Services provides transaction, investment and information services. Treasury Services provides cash management, trade, wholesale card and liquidity products and services to small and mid-sized companies, multinational corporations, financial institutions and government entities. The company partners with the Commercial Banking, Retail Financial Services, and Asset Management businesses to serve clients.

Asset Management

Asset Management offers investment and wealth management. AM offers global investment management in equities, fixed income, real estate, hedge funds, private equity and liquidity, including money market instruments and bank deposits. AM also provides trust and estate, banking and brokerage services to high-net-worth clients, and retirement services for corporations and individuals. The majority of AM's client assets are in actively managed portfolios.

Retail Financial Services

Retail Financial Services segment includes the Retail Banking and Consumer Lending businesses, serves consumers and businesses through personal service at bank branches and through ATMs, online banking and telephone banking, as well as through auto dealerships and school financial-aid offices. Customers can use approximately 5,100 bank branches and 15,400 ATMs, as well as online and mobile banking around the clock.

Card Services

Card Services segment issues credit cards and processes MasterCard and Visa payments.

Significant Events

As of January 1, 2010, JPMorgan Chase & Co. split its consumer lending segment into two further segments for reporting purposes: mortgage banking and other consumer lending; and real estate portfolios. The Mortgage banking and other consumer lending segment comprises mortgage production and servicing as well as auto, student and other loan originations and balances. The Real estate portfolios segment comprises residential mortgages and home equity loans, including the purchased credit-impaired portfolio acquired in the Washington Mutual Inc. transaction.

On June 9, 2010, JPMorgan Chase & Co. formed a joint venture with First Capital Securities Co., laying the groundwork for the Wall Street bank to underwrite share sales in the country's booming securities market.

History

JPMorgan Chase & Co. was founded in 1823.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
