Abstracts

Mobile payment services refer to financial transactions conducted through wireless devices such as smartphones, tablets, or wearables, enabling consumers to pay for goods and services, transfer money, or complete other monetary operations without physical cash or cards. These services typically leverage technologies like Near Field Communication (NFC), QR codes, or mobile wallets to facilitate secure, contactless payments, often integrating with banking systems, digital wallets, or merchant platforms to provide a seamless user experience. The scope includes peer-to-peer transfers, in-store payments, online purchases, and bill payments, with security measures such as encryption, tokenization, and biometric authentication ensuring data protection and fraud prevention.

The global Mobile Payment Services market size was estimated at USD 2345.6 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 18.50% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Mobile Payment Services market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.
