Report Scope

The market has been segmented based on organization size, deployment, end-user industry and geography. The report provides an overview of the global AIOps market, analyzes market trends and provides a qualitative analysis of application landscape.

With 2020 as the base year, the report provides estimated market data for the forecast period of 2021 through 2026. Revenue forecasts for this period are segmented based on organization size, deployment, end-user industry and geography. Market values have been estimated based on the total segmental revenue of the AI solutions, including platform and services, aimed at addressing IT operations.

The report covers the market for AIOps with regards to applications in various end-user industries across different regions. It also focuses on the major trends and challenges that affect the market and the vendor landscape. Application of AI and ML in areas such as experience management operations and delivery automation are not considered as part of the scope of the study.

Report Includes

35 data tables and 33 additional tables

An overview of the global market for AIOps or artificial intelligence for IT operations
