Abstracts

NetScout Systems Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between NetScout Systems Inc. and its competitors. This provides our Clients with a clear understanding of NetScout Systems Inc. position in the [Software and Technology Services](#) Industry.

The report contains detailed information about NetScout Systems Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for NetScout Systems Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The NetScout Systems Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes NetScout Systems Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of NetScout Systems Inc. business.

About NetScout Systems Inc.

NetScout Systems, Inc. designs, develops, manufactures, markets, sells, and supports market unified service delivery management, service assurance, and application and network performance management solutions focused on service delivery for Internet protocol (IP) based service delivery environments.

The company manufactures and markets the products in integrated hardware and software solutions that are used by commercial enterprises, governmental agencies, and telecommunication service providers worldwide.

Products and Technology

The company has developed three distinct product families that range from portable field service tools, to hot-spot deep packet analysis, and forensics.

nGenius Service Assurance Solution - delivers visibility into performance of the network, applications, services, and users. Leveraging a family of unified software modules and packet-flow based metadata, the nGenius solution delivers visibility into the service delivery environment.

Sniffer Analysis Software Suite - provides a direct connection to nGenius InfiniStream appliances for forensic analysis and packet data mining to exploit the information contained within network packets. The Sniffer Analysis software suite provides a view deep into IP network packets revealing granular information about network and application interactions, and response time and latency metrics.

Sniffer Portable Analyzer Product Family - provides portable network and application analysis capabilities for plug-and-play and field deployments. Built on deployed Sniffer technology, the software is deployed on individual laptops for portable analysis and troubleshooting to enable rapid isolation of issues for wired and wireless networks.

nGenius Service Assurance Solution - The nGenius Service Assurance Solution is an integrated unified service delivery management platform provides real-time network, application, and service performance intelligence. The nGenius Service Assurance Solution provides always-on network and application visibility with a common and consistent view of service-oriented analysis and reporting functions.

Unified aggregate service views with intelligent automated anomaly detection to understand service-level performance and predict network, application, and service performance degradations to minimize or avoid service impacting degradations.

Network, application and service performance management with unified real-time and historical views.

Packet-level forensic analysis enabling deep-packet visibility and granular back-in time historical analysis.

Planning and optimization capabilities showing how resources are being consumed and revealing capacity shortfalls to keep service delivery environments running at peak efficiency and performance levels and to leverage existing IT technology investments.

Service and Policy validation delivers key metrics and insight into the service delivery environment to validate the impact of the implementation of new network optimization, policies for applications and services.

The nGenius Service Assurance Solution brings a unified approach to managing service delivery that enables organizations to improve the overall quality of service for applications and service delivered.

The nGenius Service Assurance Solution is a unified platform that leverages a number of specialized modules and intelligent data sources and consists of:

nGenius Performance Manager – Analyzes and correlates the meta-data delivered by a range of intelligent data sources (hardware appliances and software-based agents) for integrated network, application and service performance monitoring, response time analysis, troubleshooting, capacity planning and trending, and long-term reporting.

nGenius K2 Service Delivery Manager – Used in conjunction with nGenius Performance Manager, nGenius K2 delivers service-oriented views and virtual topology maps to provide a level view of the health of applications and services, as well as automatically detect anomalous changes in network, application, and service behavior.

nGenius Subscriber Intelligence – designed for mobile operators, nGenius Subscriber Intelligence

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
