The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Reliance Infrastructure Ltd business.

About Reliance Infrastructure Ltd

Reliance Infrastructure Limited engages in the generation, transmission, distribution, and trading of power in India. The company also focuses on other key infrastructural areas, such as highways, roads, bridges, metro rail, and other mass rapid transit systems, special economic zones, and real estate.

The company distributes approximately 36 billion units of electricity to approximately 30 million consumers across an area that spans approximately 1,24,300 square kilometers and includes India's two primary cities, Mumbai and Delhi. It generates approximately 940 MW of electricity through its power stations located in Maharashtra, Andhra Pradesh, Kerala, Karnataka, and Goa.

Segments

The company operates in two business segments, Electrical Energy; and Engineering, Procurement, and Construction (EPC) and Contracts.

Electrical Energy

In the case of Electrical Energy, the company operates a 500 MW Thermal Power

Station at Dahanu; a 220 MW combined cycle power plant at Samalkot; a 48 MW combined cycle power plant at Mormugao; and a 7.59 MW Windfarm at Chitradurga. It also purchases power from third parties and supplies the power through its own distribution grid. The company supplies power to residential, industrial, commercial, and other consumers.

EPC and Contracts

The EPC and Contracts Segment render value-added services in construction, erection, and commissioning. It undertakes contracts of projects in various fields like power generation, transmission, and distribution. This division mainly focuses on the power sector projects.

Joint Ventures

The company entered into a joint venture agreement with Power Grid Corporation of India Limited (PGCIL), for setting up the transmission network for Parbati and Koldam hydroelectric projects in Himachal Pradesh.

The company entered a joint venture agreement with Geopetrol International Inc. and Reliance Natural Resources Limited (the consortium) has been allotted four coal bed methane (CBM) blocks from Ministry of Petroleum and Natural Gas (Mo PNG) covering an acreage of 3,266 square kilometers in the States of Madhya Pradesh, Andhra Pradesh, and Rajasthan. The consortium has entered into a production sharing agreement with Government of India for exploration and production of these four CBM blocks. The company has 45% share in each of four blocks.

The company along with Geopetrol International Inc, Naftogaz India Private Limited, and Reliance Natural Resources Limited (the consortium) has been allotted oil block from Ministry of Petroleum and Natural Gas (Mo PNG), in the State of Mizoram under the New Exploration Licensing Policy, covering an acreage of 3,619 square kilometers and the consortium has an agreement with the Government of India for exploration, and production of an Oil and Gas block. The company has 70 percent non-operating interest in the block.

History

The company was incorporated in 1929. It was formerly known as Reliance Energy Limited and changed its name to Reliance Infrastructure Limited in April 2008.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
