The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Scope Industries business.

About Scope Industries

Scope Industries (the Company) was organized and incorporated in the State of California in 1938. The Company and its subsidiaries have organized its business into principally two business segments include Waste Material Recycling and Vocational Beauty Schools.

Operating Segments

Waste Material Recycling Segment

In this business segment, the Company operates plants for the collection and processing of bakery waste materials into a food supplement for animals. The Company currently operates 13 manufacturing facilities throughout the United States under the names of Dext Company, International Processing Corporation (IPC); Recycle to Conserve and ReConserve in which animal food supplement is produced. Principal customers are dairies, feed lots, pet food manufacturers and poultry farms.

The Company also owns and operates a plant in Vernon, California under the name Topnotch Foods, where bakery waste material is processed and converted into edible breadcrumbs for human consumption. The principal customers are pre-packaged and

restaurant supply food processors. The waste material-recycling segment is dependent upon the Company's ability to secure surplus and waste material, which it does under long-term contracts with bakeries and snack food manufacturers. The competition for securing the waste and surplus material is widespread and intensive.

Vocational School Group Segment

Scope Beauty Enterprises, Inc., doing business as Marinello Schools of Beauty, is comprised of 13 vocational beauty schools where cosmetology and manicuring are taught. The schools are located in southern California and Nevada. At its vocational beauty schools, the Company enrolls students who pay tuition to learn to become cosmetologist or manicurist. Vocational programs and Federal grants are also utilized for the students' tuition. In addition, members of the public patronize the schools for hair styling and other cosmetological services that are performed by students. They usually are competitive schools available to the public near each of the Company's schools.

Other Business

The Company owns various oil and gas royalty and working interests. The Company owns 207 acres of unimproved real estate in Ventura County, California that the Company has decided to sell. The Company also owns and manages various marketable and non-marketable securities, U.S. Treasury Bills and other short-term investments.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
