## Abstracts

Global Automotive Gear Oil Market is valued approximately USD billion in 2019 and is anticipated to grow with a healthy growth rate of more than over the forecast period 2020-2027. Automotive gears are rotating machine parts with cogs which couple to transmit torque with another rotating part. The substance is useful for lubricating gears, reducing engine heating, providing high transmission efficiency, protecting against rusting & corrosion, ensuring better oxidation and good friction of the clutch. The demand for automotive gear oil is driven by improved quality of gear oils, increasing automotive industry and rising luxury and high-end vehicle fleets. The surging production of both passenger and commercial vehicles is acting as a key driver towards the surge and development of automotive gear oil market. For Instance: According to International organization of motor vehicle manufacturers, the production of both passenger cars and commercial vehicles was on the surging trend in Brazil. The production of vehicles witnessed a rise as around 2879809 units consisting of both passenger cars & commercial vehicles were produced in the year 2018 in comparison to 2699672 units in the year 2017 indicating a surge of around 5.4% which was the highest among the Latin American countries in the year 2018. The production of passenger cars accounted for 2386758 units in the year 2018 as compared to 2269468

units in the year 2017.
