## Abstracts

Solarfun Power Holdings Co. Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Solarfun Power Holdings Co. Ltd. and its competitors. This provides our Clients with a clear understanding of Solarfun Power Holdings Co. Ltd. position in the [Semiconductor Industry](#).

The report contains detailed information about Solarfun Power Holdings Co. Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Solarfun Power Holdings Co. Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Solarfun Power Holdings Co. Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Solarfun Power Holdings Co. Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Solarfun Power Holdings Co. Ltd. business.

### **About Solarfun Power Holdings Co. Ltd.**

Solarfun Power Holdings Co., Ltd., an investment holding company, engages in the manufacture and sale of silicon ingots, photovoltaic (PV) cells and PV modules in China. The company also provides PV cell processing services and PV module processing services. It sells PV cells and PV modules both directly to system integrators and through third party distributors. The company conducts its business in China through its operating subsidiary, Jiangsu Linyang Solarfun Co., Ltd.

#### **Products and Services**

**PV Cells:** A PV cell is a semiconductor device that converts sunlight into electricity by a process known as the photovoltaic effect. The two types of PV cells that it produces include Monocrystalline silicon cell and Multicrystalline silicon cell. In 2009, the company introduced ECLIPSE, a line of PV cells and modules with reduced light induced degradation.

**PV Modules:** A PV module is an assembly of PV cells that have been electrically interconnected and laminated in a weather-proof package. It has been selling a range of PV modules, ranging from 5W to 200W in power output specification, made primarily

from the PV cells it manufactures.

**Ingots:** The company also manufactures monocrystalline ingots through Yangguang Solar, an ingot plant. It operates 40 monocrystalline ingot production furnaces and 48 multicrystalline ingot production furnaces, with approximately 280 MW of annual manufacturing capacity. The ingots manufactured by Yangguang Solar are used for its manufacture of PV cells and PV modules.

### Services

The company provides PV module processing services to convert PV cells into PV modules on behalf of a third party.

### Customers

The company sells its PV modules through distributors and directly to system integrators. Its customers include international solar power system integrators and distributors. The company's system integrator customers provide value-added services and typically design and sell systems that use its PV modules. The company's products and services are primarily provided to European customers.

In 2009, the company's major customers included Conergy, Martifer Solar SA, Nobility Solar Projects, Q-cell, Schüco and Sonnenzins Solar GMBH. In 2009, it sold its products to approximately 40 customers, mostly in Germany, the Czech Republic, Portugal, Australia, and China.

### Suppliers

The company's principal silicon suppliers include E-mei Semiconductor Material Factory, GCL Silicon Technology Holdings Limited, Gaojia Solar (Wuxi) Co., Ltd., Solar Power Industries, LDK, and Samsung.

### Competition

The company's main overseas competitors include Mitsubishi Electric Corporation, Sharp Corporation, and Sunpower Corporation. Its primary competitors in China include Suntech Power Holdings Co., Ltd., Trina Solar Ltd., Yingli Green Energy Holdings Co., Ltd., and Canadian Solar Inc.

## History

Solarfun Power Holdings Co., Ltd. was founded in 2004.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
