Abstracts

Standex International Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Standex International Corp. and its competitors. This provides our Clients with a clear understanding of Standex International Corp. position in the [Conglomerates](#) Industry.

The report contains detailed information about Standex International Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Standex International Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Standex International Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Standex International Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Standex International Corp. business.

About Standex International Corp.

Standex International Corporation offers products and services for industrial market segments.

Segments

The company's segments include Food Service Equipment Group, Air Distribution Products Group (ADP), Engraving Group, Engineering Technologies Group, and Electronics and Hydraulics Group.

Food Service Equipment Group

This segment manufactures commercial food service equipment. Its products are used throughout the food service process; from storage, to preparation, to cooking, and to display. The equipment that it designs and manufactures is utilized in restaurants, convenience stores, quick-service restaurants, supermarkets, drug stores, and institutions, such as hotels, casinos, and corporate and school cafeterias. The Food Service Equipment Group also applies technology and product expertise in the health science and medical markets. Customers in this segment include laboratories, health care institutions, and blood banks.

The company's brands and products include Master-Bilt refrigerated cabinets, cases, display units, and walk-in coolers and freezers; Nor-Lake, Incorporated and Kool Star refrigerated walk-in coolers, freezers, refrigeration systems, and cases; APW Wyott, American Permanent Ware, Bakers Pride and BevLes commercial ovens, griddles, char broilers, and toasters used in cooking, toasting, warming, and merchandising food; American Foodservice custom-fabricated food service counters, buffet tables, and cabinets; Barbecue King and BKI commercial cook and hold units, rotisseries, pressure fryers, ovens, and baking equipment; Federal Industries merchandizing display cases; and Procon rotary vane pumps used in beverage and industrial fluid handling applications.

Air Distribution Products Group

This segment manufactures metal duct and fittings for residential heating, ventilating, and air conditioning applications. Its products are sold through HVAC wholesalers and do-it-yourself stores. Its brand names in Air Distribution Products include Snappy, ACME, ALCO, and Standex.

Engraving Group

This segment offers texturizing molds used in the production of plastic components. It provides texturizing services for molds used to produce plastic components used in automotive applications and consumer products, including toys, computers, and other electronics devices. It serves its customers within geographic areas, including the United States, Canada, Europe, China, Southeast Asia, Australia, and South America. In addition to mold texturizing, the Engraving Group also produces embossed and engraved rolls and plates and process tooling and machinery. The companies and products within the Engraving Group include Roehlen, I R International and Eastern Engraving, which engrave and emboss rolls and plates used in manufacturing continuous length materials; Innovent which makes specialized tooling used to manufacture absorbent cores of various consumer and medical products; Mold-Tech, which texturizes molds used in manufacturing plastic injected components; Mullen Burst Testers; and Perkins converting and finishing machinery. Its products are sold direct and through manufacturers' representatives. The Engraving Group serves various industries, including the automotive, plastics, building products, synthetic materials, converting, textile and paper industry, computer, houseware, and construction industries.

Engineering Technologies Group

This segment consists of Spincraft operating segment, which provides solutions in the fabrication and machining of engineered components. Sales are made directly to its customers in the aerospace, energy, defense, marine, and aviation markets.

Electronics and Hydraulics Group

Custom Hoists: It provides single and double acting telescopic and piston rod hydraulic cylinders to manufacturers of dump truck and dump trailers and other material handling applications. Sales are made directly to original equipment manufactures (OEMs) manufacturing dump trucks, trash collection vehicles, lift trucks, and other mobile units requiring hydraulic power.

Standex Electronics: It manufactures reed switches, electrical connectors, sensors, toroids and relays, fixed and variable inductors and electronic assemblies, fluid sensors, tunable inductors, transformers, and magnetic components. End user market segments includes automotive, white goods, lighting, HVAC, aerospace, military, medical, security, and general industrial applications.

International Operations

The company's international operations are conducted at 26 locations, in Europe, Canada, China, India, Singapore, Australia, Mexico, and Brazil.

History

Standex International Corporation was founded in 1955.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
