Report Overview
Polyester Air Bag Yarn is a type of synthetic textile yarn primarily composed of polyester fibers. It is specifically engineered to have a hollow or air-filled core, which gives it unique properties such as lightweight, high bulk, and excellent softness. This yarn is produced through a process that incorporates air into the filament structure, resulting in a yarn with a larger volume compared to solid yarns of the same weight. It is commonly used in various applications, including bedding, upholstery, and clothing, due to its softness, resilience, and durability. The air-filled core also provides insulation, making it suitable for products that require warmth or breathability. Additionally, Polyester Air Bag Yarn offers cost-effectiveness and versatility, as it can be easily dyed and processed into a wide range of textile products.
