Abstracts

Bishop and Associates Inc. announces the release of a new twelve chapter, 211 page research report providing both qualitative and quantitative analysis of the World Renewable Energy Market for connectors. This report explores the solar and wind energy market segments within the Renewable Energy market, focusing on applications that represent growth opportunities for connector manufacturers actively selling into these markets. Both contain an impressive amount of interconnect content, ongoing product development, new standards and technologies, with strong global attention and economic support.

Each chapter specific to the noted renewable energy segments identifies connector content and opportunities, as well as market conditions, market drivers, key players, technology and applications. A series of tables and charts for each market segment includes 2010 and 2011 connector sales by product type and region, with percent change. In addition, a five-year forecast (2011 to 2016) is provided by region, connector category and CAGR.

Renewable Energy Market

Renewable energy installations are making significant contributions to the global energy supply. The global renewable energy market grew by 8% in 2011. Globally, wind and solar PV accounted for almost 40% and 30% of new renewable capacity, respectively. By the end of 2011, operating renewable capacity comprised more than 25% of total global power generating capacity and supplied an estimated 20.3% of global electricity.

Renewable energy demand has generated a series of new connectors that address the unique performance and environmental resistance required by equipment related to solar panel arrays and wind turbine farms. Prolonged exposure to extreme weather conditions, as well as UV, and salt spray requires extensive sealing mechanisms to

insure reliable service over many years. These requirements are also being fulfilled by many of the standard connectors in the market today.

Regional Markets
Connector Types (by Product Category)
Not Included in this Report

CHAPTER 2 RENEWABLE ENERGY OVERVIEW AND EXECUTIVE SUMMARY

Market Drivers
Regional Market Activity
Renewable Power Capacities, Top Seven Countries, 2011
Renewable Energy Industry
Investment Trends in the Renewable Energy Market
2011 Renewable Energy Market Segment Highlights
Wind Energy
Wind Energy Total World Capacity, 1996 – 2011
Solar Energy
Solar Photovoltaic (PV)
Solar PV Total World Capacity, 1996 – 2011
Concentrating Solar Thermal Power (CSP)
CSP Total World Capacity, 1998 – 2011
Solar Thermal Heating and Cooling
Other Renewable Energy Resources
Geothermal Heat and Power
Hydropower
Ocean Energy
Outlook for Global Renewable Energy

CHAPTER 3 RENEWABLE ENERGY CONNECTOR MARKET ANALYSIS

World Renewable Energy Connector Sales by Region 2011 – 2016
World Industrial and Renewable Energy Market Connector Sales Forecast 2011 – 2016
Renewable Energy Connector Market 2010, 2011 and 2012
World 2010, 2011 and 2012 Renewable Energy Connector Sales by Region, Percent

Change

2011 Renewable Energy Connector Sales by Region

World 2010 and 2011 Renewable Energy Connector Sales by Region

Renewable Energy Connector Market 2011 – 2016

World 2011 and 2016 Renewable Energy Connector Sales Forecast by Region, 5-Year CAGR

2016 Renewable Connector Sales Forecast by Region

World 2011 and 2016 Renewable Energy Connector Sales Forecast by Region
