Abstracts

Global Soy Protein Concentrate Market is valued approximately USD 3.48 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 6.8 % over the forecast period 2020-2027. Soy Protein Concentrate is a type of protein which is made from soybean meal that has been dehulled and defatted. Consuming this product helps in keeping the body healthy due to the presence of large amount of proteins that are beneficial for all age groups. The major driver for Soy Protein Concentrate Market is that the population has been shifting towards being vegan. Vegan population needs to take ample amount of protein that they find in soy products, which is an alternative to meat products. For instance, according to the viva.org.uk data of 2020, there has been a 600% increase in people turning vegan in the U.S in the last three years. The other driver that is expected to boost the market growth is that soy protein concentrates are affordable to all the categories of population. At low cost they can provide a good amount of proteins needed by the human body. However, rise in the ban on soy products of Gm origin and unpleasant flavor of soy products may impede the growth of the market over the forecast period of 2020-2027. Also, with the rising research & development to make soy products with better flavors and developing end-use industries, the adoption & demand for soy protein concentrate is likely to increase.

The regional analysis of global Soy Protein Concentrate market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the

World. North America is the leading region across the world in terms of market share owing to the innovation by the manufacturers and the growing obesity in the population, they have become more aware in changing their lifestyle and diet pattern. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate over the forecast period 2020-2027. Factors such as rising disposable income, availability of raw material and people preferring balanced diet to remain healthy & fit would create lucrative growth prospects for the Soy Protein Concentrate market across Asia-Pacific region.
