Abstracts

Carton overwrap films are specialized packaging materials, typically manufactured from polyethylene, polypropylene, or PVC, designed to bundle and protect multiple consumer product cartons during transit and retail display. These films provide tamper evidence, moisture resistance, dust protection, and branding opportunities through printed graphics, while also ensuring unit integrity for products like beverage multipacks, canned goods, and cosmetic sets. Key functional attributes include puncture resistance, clarity for product visibility, and compatibility with high-speed automated wrapping machinery, making them essential in supply chains where secondary packaging efficiency and visual appeal are prioritized.

The global Carton Overwrap Films market size was estimated at USD 2865.42 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.85% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Carton Overwrap Films market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Carton
