Teflon release cloth is a high-performance release material, usually made of polytetrafluoroethylene coated on fiberglass cloth or other substrates. It has the characteristics of non-stick, high temperature resistance, chemical corrosion resistance and wear resistance. . It is suitable for processing processes that require frequent demoulding, such as composite molding, plastic hot pressing molding, etc. During the production process, Teflon mold release cloth can effectively prevent the molding material from adhering to the mold surface. It is easy to clean and can be used multiple times, greatly improving production efficiency and product quality.Teflon release cloth is a high-performance fabric treated with Teflon coating. It is widely used in the release process in high-temperature and high-pressure environments such as composite materials, rubber, and chemical processing.
