Abstracts

Phosphorus ore is an irreplaceable and non-renewable resource. China is the second largest phosphorus ore reserves country in the world, following Morocco. Though China's phosphorus ore resource is abundant, its grade is low in general, for instance, phosphorus ore reserves with grade of 30% or above is only 1.108 million tonnes in China, accounting for only 8% of the total reserves. There were 192 phosphorus ore enterprises with total output amounting to 57,654,000 tonnes in China in 2009. In China's phosphorus ore industry, it is a mainstream in future that giant enterprises which are engaged in production of phosphorus ore and its downstream products will integrate phosphorus ore resource and merge small enterprises.

In this report, CCM will provide you insight analyses on the following aspects:

To provide detailed information of Chinese phosphorus ore reserves, grade of ore, economic value, distribution and problems need to be solved.

To release key information of major enterprises including capacity, output, operating rate, mining right of phosphorus ore, strategies, competitiveness and downstream industries.

To provide consumption structure of downstream industries and its changes, supply & demand, market value, price trend and influencing factors for market.

To provide forecast on Chinese phosphorus ore reserves and production and its potential impacts on the whole phosphate chemical industry in China.

Contents

Executive summary

Methodology

I OVERVIEW OF PHOSPHORUS ORE RESOURCE

II PHOSPHORUS ORE DISTRIBUTION AMONG ENTERPRISES

II-1 Supply overview

II-2 Exploiting enterprises

III MARKET OF PHOSPHORUS ORE

IV FUTURE PROSPECT

COMPANIES MENTIONED

Yuntianhua Group; Hubei Yihua Group; Guizhou Kailin (Group) Co., Ltd.; Hubei Xingfa Chemicals Group Co., Ltd.; Wengfu Group
