Abstracts

Lipase output in China used to be small. The year 2003 is a turning point, after which the production situation turns better. The product's output has kept increasing in the past few years; reaching 2,464 tonnes in 2010. This report shows you the production situation before and after 2003, the latest and specific production situation of producers in China, and their dynamics as well.

In China, lipase is widely used in papermaking, backed food and other fields. The largest application field is papermaking, with consumption accounting for about 80% of the product's total consumption in 2009. How about the consumption detail concerning papermaking and other fields? What's the future trend of demand for lipase?

This report help you—

Gain vital business intelligence of China's lipase industry before entering the competition;
