Table of Content

This Excel-based Data-rich Deliverable (DRD) that is part of the Business Networks subscription includes market intelligence on Network Hardware: Router expenditures by size of business. Compass Intelligence defines routers as devices that forward data packets along networks. Network hardware consists of equipment purchased to connect PCs to one another in local area networks, as well as to connect locations/LANs via wide-area networks. This equipment includes the major categories of routers, LAN switches, modems, hubs, remote access servers. Other hardware includes cabling and LAN-related installation and design service, as well as on-going maintenance/monitoring/support services, where applicable. Size of business includes SOHO (1-4 employees), Small Business (5-99 employees), Mid-Sized Business (100-999 employees), and Enterprise Business (Over 1000 employees). The Expert Guide for this deliverable is Stephanie Atkinson. Forecasts are from 2005 through 2010 and include annual growth rates, as well as percentage of total market.

Sources: Compass Intelligence's segment and market forecasts, which include business expenditures, market demographics, and usage and adoption statistics are built using multiple sources, including proprietary Compass Intelligence research. These sources include, but are not limited to, secondary research, government data and statistics (e.g. Department of Commerce, Federal Communication Commission, Bureau of Labor Statistics and US Census Bureau), primary research, vendor-based research and in-depth interviews with key decision-makers, where relevant. Compass Intelligence selects data sources to provide greatest degree of perspective on each market or segment, in addition to the highest level of data accuracy, stability, and consistency over time.
