Abstracts

Atomized ferro silicon powder is a high-tech product. With low oxygen content, spherical particle shape, spreading and excellent fluidity characteristics, the atomized ferro silicon can not be matched or replaced by the common ferro silicon. The spherical particle ensures its proper blending in the welding flux.

Scope of the Report:

This report focuses on the Atomized Ferrosilicon in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Atomized Ferrosilicon industry is concentrated relatively. Currently, there are many producing companies in the world Atomized Ferrosilicon industry. The main market players are M & M Alloys, Imexsar, Sinoferro, Anyang Xinchuang Metallurgy Material, DMS Powders and Westbrook Resources Ltd. The poduction of Atomized Ferrosilicon will increase to 62 K MT in 2017 from 49 K MT in 2012 with average growth rate of 5.05%.
In consumption market, China, Middle East and Africa and Europe are the mainly consumption regions due to the bigger demand of downstream applications. In 2016, these three regions occupied 71.90% of the global consumption volume in total.
