Abstracts

Mood-Boosting Drink is a type of drink designed to enhance the drinker's emotional state and bring a sense of upliftment. Such drinks often contain specific ingredients, such as caffeine, vitamins, amino acids or other natural extracts, which are thought to stimulate the central nervous system and increase alertness, thereby improving mood and increasing energy.As consumers continue to pay more attention to health, Mood-Boosting Drink not only needs to provide uplifting effects, but also needs to ensure the healthiness of the product. This means that beverage manufacturers will pay more attention to selecting natural and healthy ingredients and avoid using too many additives and sugars. At the same time, functionality will also become an important selling point of products, such as adding ingredients with antioxidant, anti-inflammatory or refreshing functions.

The global Mood-Boosting Drink market size was estimated at USD 81.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Mood-Boosting Drink market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.
