According to our (Global Info Research) latest study, the global Commercial Asset Finance market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

Commercial asset finance is a type of secured business loan that allows a business to buy assets without the upfront costs of large purchases.

Owners often want to grow their businesses, take advantage of immediate opportunities or buy equipment without delay. Asset finance allows you to buy what you need and spread the cost over several years with affordable monthly repayments. This has the added benefit of not tying up other lines of credit or using all the business' spare cash.

With commercial asset finance, a company can add or replace equipment, buy vehicles or refit their premises, enabling them to expand or keep up with the market. A lender purchases the assets a business needs and then leases them back through fixed monthly payments over an agreed period.

This report is a detailed and comprehensive analysis for global Commercial Asset Finance market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application.
