Compound Motherwort Extract Capsules are a proprietary Traditional Chinese Medicine (TCM) gynecological product formulated primarily from Motherwort (*Leonurus japonicus*), Prepared Rehmannia Root, and Angelica Sinensis. Produced through processes including extraction, concentration, drying, granulation, and encapsulation, the product functions mainly to regulate menstruation, promote blood circulation, dispel blood stasis, and foster tissue regeneration. It is indicated for conditions caused by blood stasis—such as menorrhagia (excessive menstrual bleeding), hypomenorrhea (scanty menstruation), and prolonged menstruation—as well as persistent lochia resulting from incomplete postpartum uterine involution. The upstream supply chain encompasses Motherwort cultivation and harvesting, year-round supply of fresh Motherwort, processing into herbal decoction pieces, Motherwort extract, capsule shells (gelatin or plant-based materials), soft-gel ingredients (vegetable oil, glycerin, beeswax), packaging materials (aluminum-plastic blisters, paper cartons), and quality testing equipment. The midstream sector involves TCM extraction, concentration, capsule filling or soft-gel encapsulation, drying, packaging, stability testing, and registration/brand sales. Downstream customers primarily include hospital gynecology departments, maternal and child health institutions, pharmacies, e-commerce platforms, primary healthcare facilities, and overseas herbal supplement retail channels.
