Abstracts

The global Float Glass Furnace market size is expected to reach $ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Float glass furnace is an essential equipment used for producing flat glass of high quality with uniform thickness. The global market for float glass furnace is expected to grow rapidly, owing to increased demand for flat glass in various industries such as construction, automotive, and electronics. The need for energy-efficient flat glass, which contributes to reducing carbon emissions, is also driving the demand for float glass furnace. Moreover, the expansion of the construction industry in developing economies and increasing urbanization have significantly increased demand for flat glass in recent years. This trend is expected to continue, especially in regions such as Asia Pacific, which is the largest consumer of flat glass. The COVID-19 pandemic has impacted the growth of the float glass furnace market; however, with increased focus on infrastructure spending and economic recovery, there has been a resurgence in the demand for flat glass. In conclusion, the float glass furnace market is expected to grow significantly in the coming years, given the increasing demand for energy-efficient and high-quality flat glass, especially in the construction and automotive industries.

Float glass furnace is a type of industrial furnace specifically designed for the production of flat glass or float glass. The process of producing flat glass involves producing a ribbon or sheet of glass that is completely flat, free from defects, and uniform in thickness. Float glass furnace achieves this by introducing molten glass onto a bed of molten metal, usually tin, which creates an almost perfect flat surface. The production process begins with raw materials such as silica, soda ash, limestone, dolomite, and other additives being fed into the furnace. The furnace is heated to a temperature of around 1600 degrees Celsius, and the raw materials are melted to form a molten glass

mixture. The glass is then drawn or rolled onto the molten bed of metal where it gradually cools and solidifies. Once the glass has cooled, it is moved through various annealing processes, which ensure that the glass is free from internal stresses. Float glass furnace has been a significant breakthrough in the production of high-quality flat glass. It is widely used in the automotive, construction, and architectural industries due to the exceptional quality of flat glass that it can produce. The process is energy-efficient and eco-friendly, with reduced energy consumption and minimal waste. The modern float glass furnace has evolved to include automated controls, advanced sensors, and continuous process analysis tools to ensure consistency and quality of the product.

This report studies the global Float Glass Furnace production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Float Glass Furnace, and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Float Glass Furnace that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Float Glass Furnace total production and demand, 2018-2029, (K Units)

Global Float Glass Furnace total production value, 2018-2029, (USD Million)

Global Float Glass Furnace production by region & country, production, value, CAGR, 2018-2029, (USD Million) & (K Units)

Global Float Glass Furnace consumption by region & country, CAGR, 2018-2029 & (K Units)

U.S. VS China: Float Glass Furnace domestic production, consumption, key domestic manufacturers and share

Global Float Glass Furnace production by manufacturer, production, price, value and market share 2018-2023, (USD Million) & (K Units)

Global Float Glass Furnace production by Type, production, value, CAGR, 2018-2029,

(USD Million) & (K Units)

Global Float Glass Furnace production by Application production, value, CAGR, 2018-2029, (USD Million) & (K Units)

This reports profiles key players in the global Float Glass Furnace market based on the following parameters – company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Horn, Fives Group, GlassTech Refractory, P-D Refractorie, Cardinal Glass Industries, Dominion, CMS Glass Machinery, China Triumph International Engineering and Hubei Huayuan Kiln Furnace, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals, COVID-19 and Russia-Ukraine War Influence.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Float Glass Furnace market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), volume (production, consumption) & (K Units) and average price (US$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2018-2029 by year with 2022 as the base year, 2023 as the estimate year, and 2024-2029 as the forecast year.

Key Questions Answered

1. How big is the global Float Glass Furnace market?

2. What is the demand of the global Float Glass Furnace market?

3. What is the year over year growth of the global Float Glass Furnace market?

4. What is the production and production value of the global Float Glass Furnace market?

5. Who are the key producers in the global Float Glass Furnace market?

6. What are the growth factors driving the market demand?

1 SUPPLY SUMMARY

1.1 Float Glass Furnace Introduction
1.2 World Float Glass Furnace Supply & Forecast
  1.2.1 World Float Glass Furnace Production Value (2018 & 2022 & 2029)
  1.2.2 World Float Glass Furnace Production (2018-2029)
  1.2.3 World Float Glass Furnace Pricing Trends (2018-2029)
1.3 World Float Glass Furnace Production by Region (Based on Production Site)
  1.3.1 World Float Glass Furnace Production Value by Region (2018-2029)
  1.3.2 World Float Glass Furnace Production by Region (2018-2029)
  1.3.3 World Float Glass Furnace Average Price by Region (2018-2029)
  1.3.4 North America Float Glass Furnace Production (2018-2029)
  1.3.5 Europe Float Glass Furnace Production (2018-2029)
  1.3.6 China Float Glass Furnace Production (2018-2029)
  1.3.7 Japan Float Glass Furnace Production (2018-2029)
1.4 Market Drivers, Restraints and Trends
  1.4.1 Float Glass Furnace Market Drivers
  1.4.2 Factors Affecting Demand
  1.4.3 Float Glass Furnace Major Market Trends
