Abstracts

Introduction

The report looks at the offshore oil and gas activities in Qatar. The report details the main upstream indicators of activity from drilling activity, expenditure through to production. Our data goes back to 2000 for most categories and forward to 2030 for production. It gives analysts and investors a concise guide to this important industry.

Features and benefits

Develop investment strategies through a review of key suppliers of upstream supplies and services

Identify M&A targets by analyzing offshore production data (value, volume and share) on a company-by-company basis

Analyze and identify key rigs across Qatar by comparing rigs across 26 parameters

Highlights

Oil and gas production in Qatar grew at a CAGR of 12.2% over the 2000-09 period. This is expected to grow at a CAGR of 3.7% over the 2009-30 period.

Capital Expenditure (Capex) accounted for a 46.4% share of the total offshore

expenditure in 2009 in Qatar, while Operation Expenditure (Opex) accounted for the remaining 53.6% share.
