Abstracts

According to our (Global Info Research) latest study, the global ?-NMN Supplements market size was valued at US$ 1544 million in 2025 and is forecast to a readjusted size of US$ 3110 million by 2032 with a CAGR of 10.6% during review period.

NMN, the full name of ?-nicotinamide mononucleotide (Nicotinamide Mononucleotide), is a naturally occurring nucleotide with a chemical formula of C11H15N2O8P. It is the direct precursor of nicotinamide adenine dinucleotide (NAD+) and can be converted into NAD+ in the human body, thereby participating in a variety of biological processes, including energy metabolism, DNA repair, and cell signaling. With the increase of age, the content of NMN in the human body gradually decreases, so NMN is often used as an anti-aging nutritional supplement. As the market continues to expand, governments and relevant agencies will increase their supervision of the market and formulate more complete laws, regulations and standards systems to protect consumer rights and market order. For example, Japan is the first country in the world to approve NMN as a food ingredient, while the US FDA lists NMN as a GRAS (generally recognized as safe) dietary supplement ingredient. The NMN market will achieve a deeper cross-border integration with other health industries such as biotechnology, precision medicine, and nutritional supplements, giving birth to a series of innovative products and service models. This cross-border integration not only enriches the product line of the NMN market, but also enhances its market competitiveness. Although the NMN market has broad prospects, it also faces challenges such as the proliferation of counterfeit and inferior products and exaggerated publicity that weakens consumer confidence. However, with the continuous advancement of technology and the standardized development of the market, the NMN market is expected to usher in a broader development prospect.

Competition among brands in the market is becoming increasingly fierce, requiring companies to continue to innovate to maintain their competitive advantage. At the same time, improving consumers' awareness and trust in NMN products is also the key to the continued development of the market. GeneHarbor, Herbalmax, Genex Formulas, Mirailab Bioscience, Effex Pharmaceuticals, Kingdomway, etc. are the world's leading manufacturers of nicotinamide mononucleotide. Worldwide, North America, China, and Japan are the main manufacturing regions. China is the leader in the nicotinamide mononucleotide market, and its revenue will account for 70% of the global market share in 2023.

This report is a detailed and comprehensive analysis for global ?-NMN Supplements market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:
