Highlights

UPS has been an early adopter in terms of undertaking and reporting sustainability efforts in the logistics industry. It has won a number of awards and recognitions from external agencies, including being named to the Carbon Disclosure Project's (CDP) indexes and the Dow Jones Sustainability Index (DJSI) for North America.

Through its capabilities and methodologies for route optimization and transport efficiency, UPS has increased its MPG for ground fleet by 10% during 2000–09, and achieved 3% annual reduction of CO2 emissions in 2009. It improved its on-road fuel economy by 28.9% with the inclusion of hybrid diesel electric delivery vehicles in its ground fleet.

With the adoption of continuous descent approach (CDA), UPS enhanced the efficiency of its airline fleet—reducing noise by 30%, nitrous oxide emissions by 34% and annual fuel savings of 1m gallons.
