Abstracts

The global Metal and Plastic Cable Cleats market size is expected to reach $ 386.2 million by 2030, rising at a market growth of 3.3% CAGR during the forecast period (2024-2030).

Cable cleat is a cable management product used to support and hold cables when installed at intervals along the length of cables. These are useful in ensuring long life of cables as they reduce damage caused to the cables due to their own weight. Cable cleats have been useful in applications having heavy cables, power lines and transportation infrastructure. In 2003, the standard of cable cleats for electrical installations, EN 50368, was published, and in 2009, IEC 61914 was published. Since then, cable cleats manufacturers are producing their products under the same standard.

This report studies the global Metal and Plastic Cable Cleats production, demand, key manufacturers, and key regions.
