According to our (Global Info Research) latest study, the global Puzzle Games market size was valued at US$ 2074 million in 2024 and is forecast to a readjusted size of USD 3731 million by 2031 with a CAGR of 8.8% during review period.

Puzzle games are a genre of video games that stimulate the player's problem-solving skills and critical thinking abilities. These games typically involve solving puzzles or challenges, often in the form of logic problems, pattern recognition, spatial reasoning, or word puzzles. Puzzle games can be found across various platforms, including consoles, computers, and mobile devices.

From 2022 to 2027, the CAGR of the gaming market is expected to be 9.64%. Its market value is $173.77 billion, and it is expected to reach $314.44 billion by 2027.

Puzzle games are popular among both casual gamers and those seeking short bursts of entertainment. The simplicity, ease of play, and ability to pick up and put down puzzle games at any time have made them attractive to a broad audience. This casual gaming appeal has driven the adoption of puzzle games by players of all ages and demographics. The rise of smartphones and tablets has led to a significant shift in the gaming landscape, with mobile devices becoming the primary platform for puzzle game enthusiasts. The convenience, accessibility, and wide variety of puzzle games available on mobile app stores have contributed to the growth of the market.
