## Abstracts

### Business Valuation Firms

High-value service

The industry performed relatively well during the recession, thanks to an increase in bankruptcies that offset the low level of merger and acquisition (M&A) activity. Growth is expected to continue growing at a stronger rate through the outlook period, in part because of baby boomers that will sell their businesses as they reach retirement age. Despite this growth, profit margins have been shrinking and will continue to do so.

Companies in this industry estimate the value of an owner's interest in a business. Business valuation firms are used to determine how much an entity is willing to pay to buy a business or receive to sell a business. Business valuation can also be used for other legal and business purposes.

This report covers the scope, size, disposition and growth of the industry including the key sensitivities and success factors. Also included are five year industry forecasts, growth rates and an analysis of the industry key players and their market shares.

### Major companies:

CBIZ Valuation Group LLC

## Contents
