Abstracts

Total volume sales of fresh food in Japan continue to record marginal growth in 2023, mainly driven by foodservice as the channel recovers from the significant drop during the pandemic. Foodservice volume sales suffered as COVID-19 first hit Japan, resulting in significant declines in 2020 as establishments were requested to shorten their hours of operation during the state of emergency. However, in March 2022, the Japanese government lifted the quasi-state of emergency in all cities in Japan, r...

Euromonitor International's Fresh Food in Japan report offers a comprehensive guide to the size and shape of the market at a national level. It provides the latest retail sales data in volume terms 2018-2022, allowing you to identify the sectors driving growth. It offers strategic analysis of key factors influencing the market – be they new product developments, consumption patterns and distribution data.
