Abstracts

Chemical Product Manufacturing in the UK

This sector of the chemical industry is essentially a catch-all one and covers those companies involved in the manufacture of a large and disparate array of chemical products including photographic chemicals, gelatine and its derivatives, chemically modified oils and fats, chemicals for textiles and leather processing, cement additives, hydraulic transmission liquids and writing and drawing inks.

This report covers the scope, size, disposition and growth of the industry including the key sensitivities and success factors. Also included are five year industry forecasts, growth rates and an analysis of the industry key players and their market shares.
