## Abstracts

### Electricity Transmission and Distribution in China

The Electricity Transmission and Distribution industry comprises two large power companies primarily engaged in high voltage electricity transmission, low voltage electricity distribution, and the retailing of electricity through power grids to end users. Electricity transmitted and distributed by this industry is originally purchased from different kinds of power generation enterprises.

This report covers the scope, size, disposition and growth of the industry including the key sensitivities and success factors. Also included are five year industry forecasts, growth rates and an analysis of the industry key players and their market shares.
