Abstracts

Loudspeaker Manufacturing

Sounding off

After years of recessionary woes and an increase in offshoring obliterated revenue, the industry is poised to maintain overall positive growth in the next five years. High-end speakers will allow manufacturers to price their products at a premium, ensuring wide profit margins, but offshoring and import penetration will remain threats to industry revenue.

Manufacturers in this industry produce speakers, which are electroacoustic transducers that produce sound in response to an electrical audio signal input.

This report covers the scope, size, disposition and growth of the industry including the key sensitivities and success factors. Also included are five year industry forecasts, growth rates and an analysis of the industry key players and their market shares.
