Abstracts

Mental Health & Substance Abuse Clinics in the US

Rising appreciation for mental health and substance abuse treatments will aid demand in the next five years. The improving economic environment will also play into industry growth, with higher disposable incomes and private health insurance coverage supporting revenue growth. Medicare will also increase coverage for mental health; however, a shortage of skilled labor and mounting pressure to decrease costs will lead to further consolidation.

This industry includes establishments with medical staff who primarily provide outpatient services related to the diagnosis and treatment of mental health disorders and alcohol and other substance abuse. The industry excludes facilities or hospitals that treat inpatients. Furthermore, the industry does not include establishments that primarily use medical treatment to care for mental health patients.

This report covers the scope, size, disposition and growth of the industry including the key sensitivities and success factors. Also included are five year industry forecasts, growth rates and an analysis of the industry key players and their market shares.
