Abstracts

Organic Chemical Material Manufacturing in China

The Organic Chemical Material Manufacturing industry in China produces various organic chemical materials used as chemical inputs into other chemical manufacturing processes. Major products include hydrocarbons, alcohol, phenol, ketone, aromatic hydrocarbons, acid anhydride and their derivatives. The extraction of methane and the manufacture of glycol are not included in this industry.

This report covers the scope, size, disposition and growth of the industry including the key sensitivities and success factors. Also included are five year industry forecasts, growth rates and an analysis of the industry key players and their market shares.
