This report is available both in Russian and English versions.

The report is devoted to investigation of current standing of market of iron ore resources in CIS countries and forecast of development of iron ore enterprises in Russia up to 2017. The report consists of 7 Sections, contains 325 pages, including 75 Figures, 129 Tables and Appendix. This work is desk study. As information sources, we used data of Rosstat, Inter-State Committee on Statistics of CIS countries, Federal Customs Service of Russia, official statistic data of Ukraine and Kazakhstan, information of Rudprom and Ukrudprom, official domestic railrage statistic of JSC RZhd (former Ministry of Railway Transport of Russia), sectoral (industrial) and regional press, annual and quarterly reports of companies, as well as data from web-sites of company-producers and consumers of iron ore resources.

The first Section of the report presents brief characteristics of standing of world market of iron ore resources (reserves, production, prices).

The second Section is devoted to analysis of standing of iron ore industry in the CIS, including information on volumes of mining of iron ores in distinct countries, production of commodity iron ores, concentrates and iron ore pellets.

The third Section is devoted to description of resources base of iron ore resources in Russia, including information on breakage of reserves of iron ores by Federal Districts, as well as by the greatest deposits. Analysis is conducted on mining of iron ores in Russia, including by Federal Districts, production of commodity iron ores in Russia (by Federal Districts and GOKs), consumption of iron ore resources. Analysis of Russian foreign trade in iron ore resources is presented, and the main export markets are described.

Much attention is given to analysis of standing of leading iron ore enterprises in Russia: volumes of mining ores and production of commodity iron ores, pellets, the main markets, prospects of development and other information.

The fourth Section is devoted to description of standing of iron ore industry in Ukraine: resources base, mining of iron ores and production of commodity ores, iron ore pellets, consumption of iron ore resources, the main markets, operation of a number of iron ore enterprises

The fifth Section is devoted to description of standing of iron ore industry in Kazakhstan: resources base, mining of iron ores and production of commodity products, analysis of activity of the main producers of iron ore resources, flows of export supplies and so on.

The sixth Section presents forecast of supply-demand balance of iron ore resources in Russia up to 2017 and development of iron ore enterprises in Russia.

The seventh Section of the report presents estimation of medium- and long-term market prospects of iron ore products of Kodinsky Group of deposits (at domestic and world markets).
