Abstracts

FRP (Fiber Reinforced Plastics) technology came into existence during World War II until then tanks were made of steel and other traditional materials. Later in 1960s more efficient manufacturing processes and advancement in resin technology helped to create rust-proof, strong and durable tanks. FRP tanks grew in acceptance by chemical, petroleum, paper and pulp industries as a viable and economical solution for chemical and fuel storage. This success of FRP tanks opened doors for their use in other industries. North America, the largest industry bases in the world, extensively uses FRP tanks in areas like chemical, oil & gas, water/wastewater treatment plants, pulp/paper, septic etc. FRP have the advantages of corrosion resistance, high strength-to-weight ratio, low maintenance, and a longer life cycle as compared to other traditional materials such as concrete and steel.

According to this report, the total FRP tank consumption in NA is expected to continue a strong growth momentum of 5.4% CAGR from 2010-2015. The FRP tank market in North America is expected to reach \$712 M by 2015. In the near future the use of FRP tanks is expected to increase in other application areas with new customized design.

This report also presents the detailed analysis of all the application areas of FRP tanks in 2009 and would be of great use to both materials suppliers as well as tank molders to plan their production and target high growth application areas. It will also provide you with valuable information, insights and tools needed to identify new growth opportunities and operate your business successfully in FRP tank markets. This report will save you hundreds of hours of your own personal research time and will significantly benefit you in expanding your business in this market. In today's stringent economy, you need every advantage that you can find.

Some of the features of this market report are:

FRP tank market size in terms of \$ and volume shipments

FRP tank market breakdown in various applications has been provided in this report

FRP tank market breakdown in terms of type of tanks, raw materials, market leadership position diameter size, raw materials, market leadership position

FRP tank market breakdown by Region has been provided

Major growth drivers and challenges for each of these application areas.

Trend (2004-2009) and forecast (2010-2015) of FRP tank market in North America.

Strength and Weakness of FRP tank market in North America.

FRP tank market by manufacturing process such as filament winding, hand layup etc.

Growth opportunities in emerging applications of FRP tank

Description of Molders has been provided in this report.

Contents

1. EXECUTIVE SUMMARY

- 1.1 North America FRP Tank Market Overview
- 1.2 Porter's Five Forces Analysis of North America FRP Tank Market
- 1.3 Important Notes Regarding Data Collection

2. FRP TANK INDUSTRY BACKGROUND AND CHARACTERISTICS

- 2.1 Industry Overview
- 2.2 FRP Tank Applications
 - 2.2.1 Underground and Above Ground Storage Tanks
 - 2.2.2 Tank Industry Standards / Requirements

3. FRP TANK MARKET ANALYSIS

- 3.1 FRP Tank Market 2009
- 3.2 Tank Manufacturers Market Shares
- 3.3 FRP Tank Market Segmentation by Applications
 - 3.3.1 Underground Storage Tank Application
 - 3.3.2 Aboveground Storage Tank Application
 - 3.3.3 Petroleum Tank Market
 - 3.3.4 Chemical Tank Market
 - 3.3.5 Wastewater Tank Market
 - 3.3.6 Septic Tank Market
 - 3.3.7 Pulp and Paper Tank Market
 - 3.3.8 Agriculture & Aquaculture Tank Market
- 3.4 Regional Analysis
- 3.5 Composite Materials Consumption in Tanks

4. TRENDS IN NORTH AMERICAN FRP TANK MARKET

- 4.1 FRP Tank Market Trends
- 4.2 Trends in Petroleum Market (2004-2009)
- 4.3 Trends in Septic Market (2004-2009)
- 4.4 Trends in Water/Wastewater Market (2004-2009)
- 4.6 Trends in Pulp/Paper Market (2004-2009)
- 4.7 Trends in Chemical Market (2004-2009)

4.9 Trends in Agriculture & Aquaculture Market (2004-2009)

4.10 Raw Material Trend

5. MARKET FORECASTS OF NORTH AMERICA FRP TANK MARKET (2010-15)

5.1 Growth Drivers for North America FRP Tank Market

5.2 North American FRP Tank Market Forecast by Applications

5.4 North America FRP Tank Market Forecast by Raw Material

5.5 Forecasts from the Material Suppliers Perspective

6. TANK MANUFACTURING PROCESSES

6.1 Overview of Tank Manufacturing Processes

6.1.1 Process 1

6.1.2 Process 2

6.1.3 Process 3

6.2 Tank Manufacturers by Manufacturing Process

7. GROWTH OPPORTUNITIES AND EMERGING COMPOSITE APPLICATIONS

7.1 Growth Matrix

7.2 Emerging Applications:

List Of Figures

LIST OF FIGURES

CHAPTER 1 EXECUTIVE SUMMARY

Fig. 1.1: Porter's Five Forces model for the North American FRP tank market

CHAPTER 2 FRP TANK INDUSTRY BACKGROUND AND CHARACTERISTICS

Fig. 2.1: Evolution in corrosion applications for composite products from 1950's onwards

Fig. 2.2: Opportunities in tank market

Fig. 2.3: Fiberglass underground tank

Fig. 2.4: Fiberglass tank for drinking water storage

Fig. 2.5: 65,000 gallon water storage FRP tank

Fig. 2.6: Image of horizontal fiberglass septic tank

Fig. 2.7: Image of fiberglass oil field tank

Fig. 2.8: FGD system bleed tank

Fig. 2.9: Image of underground fiberglass tank

Fig. 2.10: Image of aboveground storage fiberglass tank

CHAPTER 3 FRP TANK MARKET ANALYSIS

Fig. 3.1 Image of above ground fiberglass tank

Fig. 3.2 Image of fiberglass oil field tank

Fig. 3.3 Image of fiberglass septic tank

Fig. 3.4 Image of underground fiberglass tank

Fig. 3.5: Percent comparison of retail petroleum tank shipments by construction material in 2009

Fig. 3.6: Comparison of retail petroleum tank shipments by construction material in 2009

Fig. 3.7: Percent comparison of septic tank shipments (in terms of number) by construction material in 2009

Fig. 3.8: Number of septic tank shipments by construction material in 2009

Fig. 3.9: Comparison of tank capacity and weight for 4& 6 foot diameter tanks

Fig. 3.10: Supply chain analysis for FRP tank industry

Fig. 3.11: North American FRP tank market share analysis for 2009

Fig. 3.12: North American FRP tank market consolidation analysis

Fig. 3.13: Percent comparison between \$ shipments of AST and UST

Fig. 3.14: Comparison between \$ shipments of AST and UST

Fig. 3.15: Percent comparison by annual number of fiberglass tanks shipped for use in corrosion applications in the NA market segments

Fig. 3.16: Comparison by annual number of fiberglass tanks shipped for use in corrosion applications in the NA market segments

Fig. 3.17: Percentage comparison by sales of fiberglass tanks used in corrosion applications in the NA market segments

Fig. 3.18: Comparison by sales of fiberglass tanks used in corrosion applications in NA by the industries served

Fig. 3.19: North American FRP tank market (M lbs) by applications in 2009

Fig. 3.20: North American FRP tanks shipment (M lbs) by application in 2009

Fig. 3.21: Percentage comparison of fiberglass tanks by type of tank in North America for year 2009

Fig. 3.22: Distribution of underground storage FRP tanks in different application by \$M

Fig. 3.23: Distribution of aboveground storage FRP tanks in different application by \$M

Fig. 3.24: Percent comparison of fiberglass tank sales in chemical applications and other applications

Fig. 3.25: Dollar shipment in chemical market in 2009

Fig. 3.26: Percent comparison of retail petroleum tank shipments by construction material

Fig. 3.27: Comparison of retail petroleum tank shipments by construction material in North America
