Abstracts

According to our (Global Info Research) latest study, the global Dry Bulk Shipping market size was valued at USD 4335.8 million in 2023 and is forecast to a readjusted size of USD 5162 million by 2030 with a CAGR of 2.5% during review period.

A bulk carrier is a seagoing vessel that is specially designed to transport unpackaged bulk cargo such as grains, coal, ore, and cement in its cargo holds. A dry bulk shipping company such as Golden Ocean Group simply owns a fleet of these ships that it then uses to transport bulk cargo for a customer in exchange for money. As these shipping firms effect the transport of large quantities of these goods across the oceans and between different companies, they are critical to international trade.

The dry bulk shipping industry appears to be quite strong, with slowly increasing global trade volumes.

Time charter rates were broadly lower in the first quarter 2018 compared to the fourth quarter 2017 but this does not appear to be due to lower shipping volume.

The number of Capesize ships in the global fleet is expected to steadily increase over the next few years.

The Global Info Research report includes an overview of the development of the Dry Bulk Shipping industry chain, the market status of Iron Ore (Time Charter, Voyage), Coal (Time Charter, Voyage), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Dry Bulk Shipping.

Regionally, the report analyzes the Dry Bulk Shipping markets in key regions. North America and Europe are experiencing steady growth, driven by government initiatives and increasing consumer awareness. Asia-Pacific, particularly China, leads the global Dry Bulk Shipping market, with robust domestic demand, supportive policies, and a strong manufacturing base.

Key Features:

The report presents comprehensive understanding of the Dry Bulk Shipping market. It provides a holistic view of the industry, as well as detailed insights into individual components and stakeholders. The report analysis market dynamics, trends, challenges, and opportunities within the Dry Bulk Shipping industry.

The report involves analyzing the market at a macro level:

Market Sizing and Segmentation: Report collect data on the overall market size, including the revenue generated, and market share of different by Type (e.g., Time Charter, Voyage).

Industry Analysis: Report analyse the broader industry trends, such as government policies and regulations, technological advancements, consumer preferences, and market dynamics. This analysis helps in understanding the key drivers and challenges influencing the Dry Bulk Shipping market.

Regional Analysis: The report involves examining the Dry Bulk Shipping market at a regional or national level. Report analyses regional factors such as government incentives, infrastructure development, economic conditions, and consumer behaviour to identify variations and opportunities within different markets.

Market Projections: Report covers the gathered data and analysis to make future projections and forecasts for the Dry Bulk Shipping market. This may include estimating market growth rates, predicting market demand, and identifying emerging trends.

The report also involves a more granular approach to Dry Bulk Shipping:

Company Analysis: Report covers individual Dry Bulk Shipping players, suppliers, and other relevant industry players. This analysis includes studying their financial performance, market positioning, product portfolios, partnerships, and strategies.
